WHO WE ARE?

A true Strategy & Technology Partner for Banks and Financial institutions.

Our journey began in 2008 from the foundation of Macro Infotech in the UK. We strengthened our roots in the following year with a bigger Research & Innovation Centre based in Southern India, which has enabled us to expand our global reach.

We are a team of professionals with an enduring passion for creating customer-centric products addressing their problems with ease. Untangling the complexities with powerful smart solutions by saving time and cost for our clients is part of our DNA. Our continued thirst to be ahead of the curve drives us the extra mile to bring excellence to our delivery.

We want to be a major player within the Fintech/RegTech ecosystem to learn and give back to grow together. Our clients do not shop around multiple products to solve a problem as we offer everything in a single package from Gap Study to Go Live. We help them to be stress-free from the tiring and endless chase of product management to compliance as we do the heavy lifting, and they can focus on their core business to grow.

Our commitment to innovation and excellence led us further to invest in the RegTech ecosystem in 2014, creating niche diversified regulatory products for UK banking clients. In 2018, we introduced PSD2, an Open Banking Platform, to bring AIS & PIS product capabilities that enables banks to use our ASPSP engine to comply with the European & UK banking regulatory requirements.

In 2021, we launched MFRI, a FinTech R&D business unit that utilises new disruptive technologies to provide novel solutions wrapped around AI and ML and embedded across the company's product line. In 2023, we added zetaRP, IT Consulting and Resourcing Services offering Avant-garde strategy and technology consultation services to our clients.

We listen to your needs and offer ideal solutions leveraging our extensive financial ecosystem expertise and experience, guaranteeing accelerated ROI and recurring revenue by emphasising value in all our products and services.
